Cairns Water Security Stage 1
Gordonvale, Aloomba & Behana Gorge

Construction Works Notification #140
24 September 2026

Welcome to the latest localised update for the Cairns Water Security Stage 1 project. These construction works notifications will continue to be distributed to keep you informed of upcoming construction activities within the Gordonvale, Aloomba and Behana Gorge communities.

In September, the team successfully completed pressure testing of the pipework servicing the river wells south of the Mulgrave River, marking another key milestone as the project progresses towards commissioning.

Throughout **October 2026**, John Holland will continue construction activities across Gordonvale, Aloomba and Behana Gorge, with works continued to focus on final pipeline connections, property connection preparations, reinstatement works and upgrades at the Behana Gorge Water treatment plant.

This work will take place between **6.30am to 6.30pm Monday to Saturday**. Low impact activities associated with the works, such as water cart operations, machinery re-fueling, managing environmental controls, early morning concrete pours and traffic control may occur outside of these hours.

Works planned for October include (weather dependent):

- Continue connecting new pipes and valves to the existing network along Anderson Road, Aloomba. Advance notice will be provided if temporary traffic and/or water outage are required.
- Continue reinstatement works in areas where pipeline installation has been completed, including (but not limited to) Mill Street, Swan Street and Cairns Road. Advance notice will be provided to affected properties if temporary traffic arrangements are required.
- Continue construction works on the eastern side of the Mulgrave River, opposite Greenpatch Campground.
- Continue river well pump installation activities.
- Undertake preparation works for future property connections at several locations along the Bruce Highway.
- Continue key infrastructure upgrade works at the Behana Gorge Treatment plant. A separate notification has been issued for these works.

What can I expect?

- Intermittent excavation and construction activities associated with final pipeline connections and value installations.
- Hydro-vac trucks, and other heavy equipment operating in work areas and road reserves.
- Short-term, partial road closures, detours and traffic controllers, as required.
- Noise from construction machinery and increased vehicle movement.
- Trucks and vehicles entering/exiting work areas including Bruce Highway and other work sites.

How we are managing impacts

- John Holland will liaise with property owners if access to property is required or impacted.
- Traffic control will be in place, where required.

Thank you for your patience and cooperation while we conduct this important work.
