Cairns Water Security Stage 1

Cairns Road, Gordonvale

Construction Works Notification #060

27 June 2025

Welcome to the latest localised update for the Cairns Water Security Stage 1 project. These construction works notifications will continue to be distributed to keep you informed of upcoming construction activities within the Gordonvale, Aloomba and Behana Gorge communities.

From **Friday, 4 July 2025,** John Holland will continue trenching work for the installation of the new network of pipes on Cairns Road, Gordonvale from Norman Street to Clarke Street (see map overleaf). This work will be undertaken between **6.30am** and **6.30pm Monday** to **Saturday** and will take approximately **6 weeks** to complete, weather permitting.

To facilitate these works and for the safety of workers and the travelling public, the works will be undertaken in **three (3) stages** (see maps overleaf) and the following approved traffic diversions will be implemented.

Stage 1 (2-week duration):

- Works between Norman Street and George Street. (Hoare Lane closed at Cairns Road intersection)
- Access to Hoare Lane will be via Sheppards Street. (Refer detour map overleaf)

Stage 2 (2-week duration):

- Works between George Street and Nelson Street. (George Street closed at Cairns Road intersection)
- Access to George Street will be via Sheppards Street. (Refer detour map overleaf)

Stage 3 (2-week duration):

- Works between Nelson Street and Clarkes Street (Nelson Street closed at Cairns Road intersection).
- Access to Nelson Street will be via Sheppards Street. (Refer detour map overleaf)

These activities may result in additional traffic impacts. We recommend allowing extra travel time to account for potential delays in the area.

What can I expect?

- During construction, each open trench will be protected with traffic cones for vehicle management and temporary fencing for pedestrian management to safely delineate the work zone.
- Road closures including detours and traffic control as required.
- Delivery of pipes to the work area.
- Earthworks construction, including excavation of a trench and temporary reinstatement.
- Installation of underground pipe and backfilling of the trench.
- Construction personnel, increased vehicle movements, construction machinery and equipment operating within the area.
- Construction noise associated with these works.
- Vegetation removal as required.
- After completion of the pipe installation, local streets will be reinstated to their original condition.

How are we managing impacts?

- John Holland will liaise with property owners if access to property is required or impeded to conduct works.
- Implement traffic controls in line with road authorities
- Traffic control will be in place, where required.
- Notify residents and businesses of key activities including any out-of-hours work

Thank you for your patience and cooperation while we conduct this important work.
