Cairns Water Security Stage 1
Out-of-hours concrete pours

Construction Works Notification #037
24 April

Throughout May 2025, John Holland will continue the construction of the Cairns Water Security Stage 1 project with major construction works being conducted at the Water Treatment Plant, Jones Road.

As part of the water treatment plant works, concrete pours will be required out-of-hours (early mornings). To ensure the concrete quality is maintained, these concrete pours must be conducted when the temperature is cooler. Works will occur between **4am and 6.30pm Monday to Saturday**.

Residents in close proximity to the site, will be provided with 24 – 48 hours' notice of the concrete pour taking place via email and/or SMS text message.

Works will involve:

- Concrete pouring and finishing works.

What can I expect?

- Concrete trucks, concrete pumps and concrete vibrating screeds will be used within the construction area.
- Concrete trucks, concrete pump truck and other vehicles entering and exiting the site on Jones Road.
- Temporary lighting towers.
- Delivery of materials and equipment.
- Low impact activities such as machinery re-fuelling, managing environmental controls and traffic control may also occur.
- Construction noise associated with these works.

How we are managing impacts

- John Holland will ensure lighting is not directly facing properties.
- Workers will be briefed to ensure they keep noise to a minimum.

Thank you for your patience and cooperation while we conduct this important work.
